

Salton Sea Water Quality, Air Quality, Wetland, & Organic Conversion Regional Conservation Partnership Program Workshop

May 11, 2017 8:00 am to 10:00am

Ag Center ♦ 485 Business Park Way ♦ Imperial, CA 92251

An overview and the actual program application will be provided. As you may remember, we did an introduction in August 2016 for the grant of \$7.528 million obtained to fund various projects to support air and water quality at the Salton Sea. One aspect of the funding is to assist in the conversion of land to organic production as well as wetland restoration.

Those Imperial Valley Growers who plan to convert land to organic production are eligible to receive reimbursement for planning cost and up to 75% of practice implementation through the existing EQIP (Environmental Quality Incentive Program).

We are also inviting interested Technical Service Providers who you may wish to contract with for a plan for conversion to organic and for the organic certification.

The limit is \$450,000 per year. This workshop will identify the who, what, when, where and how of the program.

Pre-Register for the May 11, 2017 workshop by emailing the following to kay@ivvga.com.
