Dr. Rominder Suri:
Azucena Beltran:

I append the TRANSALTON information document, our proposed project for the Salton Sea improvement as part of a larger TRANSOCEANIC project for the Lower Colorado River Basin by massive importation of long-distance fresh water from Southern Mexico.

The TRANSOCEANIC project concept is new and only recently patented.

We are convinced that the TRANSOCEANIC solution is possibly the only one to save the Western USA from water scarcity, and also to improve dramatically the condition of the Salton Sea and its surroundings.

I also append the interactive spreadsheet that was included as Annex 2 in the TRANSALTON/TRANSOCEANIC document, so that our calculations are visible and can be checked.

The TRANSOCEANIC patent is here:

https://patentscope.wipo.int/search/en/detail.jsf?docId=WO2021101684&_cid=P20-KQZEKZ-53399-1

Do not hesitate to ask for information and any details you need.

Please confirm the receiving of the present email.

Sincerely,
Silviu Dorian Chelaru
Owner/CEO
