

Salton Sea Long-Term Water Importation Review

Independent Review Panel Update: Feasibility & Summary Report Completed

This final informational zoom meeting presents the Independent Review Panel's feasibility analysis and summary report of its review of water importation to the Salton Sea.

The Feasibility report provides a detailed analysis of the technical and economic feasibility of importation concepts. The Summary Report describes the overall review process, including the Panel's major findings, and recommendations.

The meeting will be attended by Panel members with the assistance of Project Coordinator Azucena Beltran and Principal Investigator Brent Haddad. Support Team analysts will also be present. If you have any questions, please send them to the public input channel (sslt-eval-input@ucsc.edu).

Friday, September 30th 5:30-7:30pm

Spanish Interpretation Will Be Available
